Assignment-3

Creation of a Simple Network Topology Using Open-Source Network Virtualization Tools

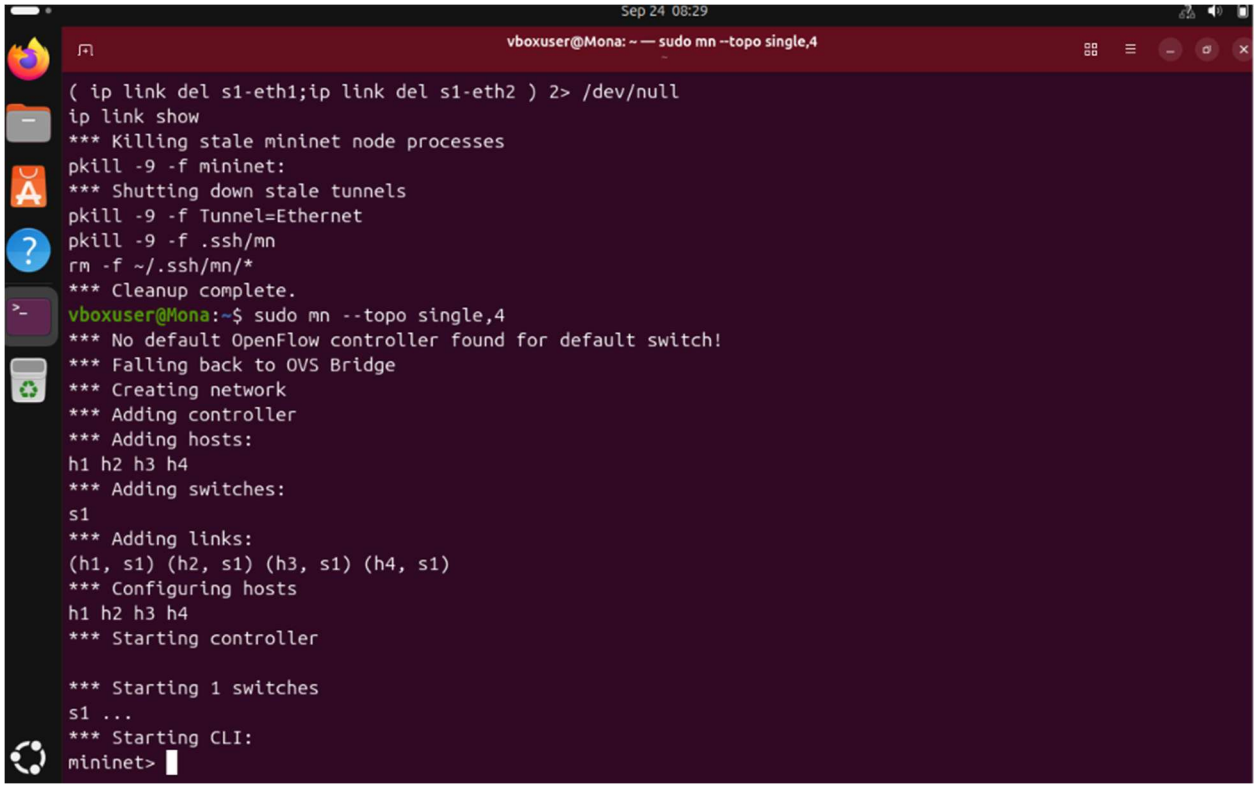

Step 01-Open the Ubuntu Linux Virtual Machine in Oracle VirtualBox .

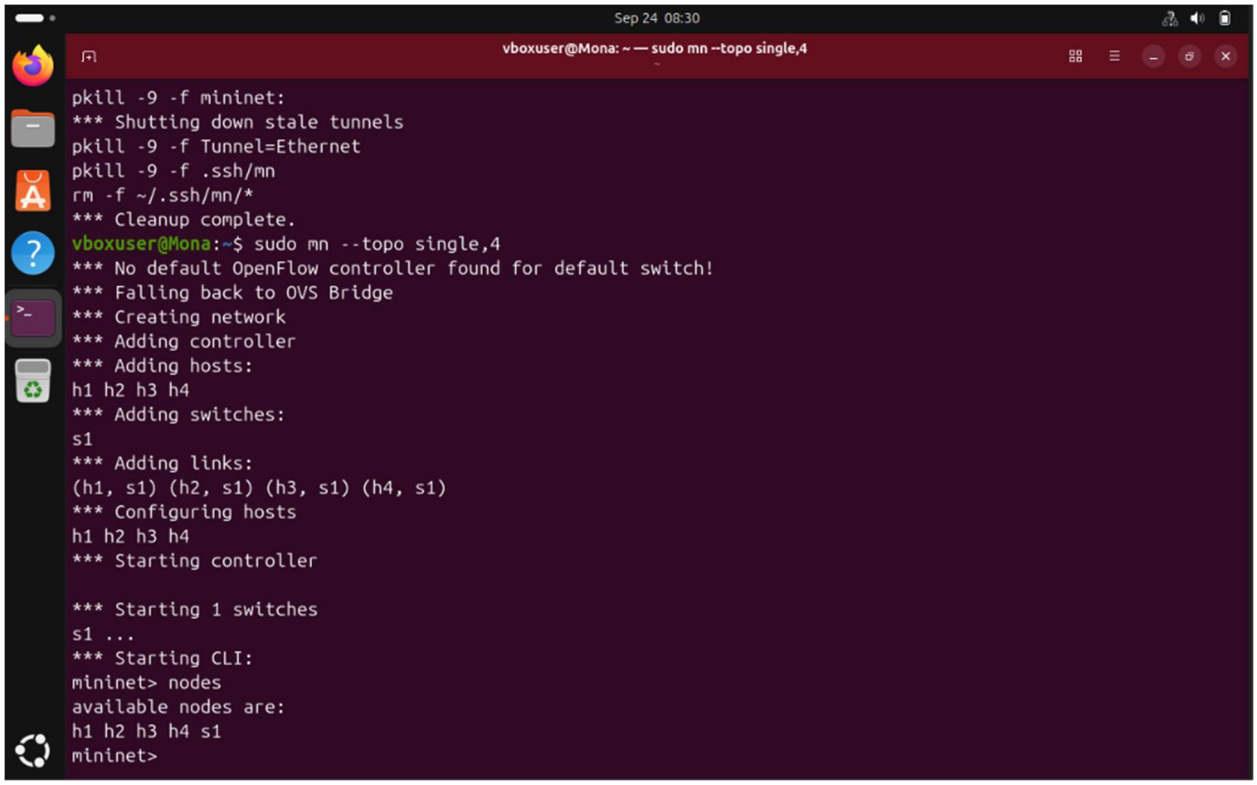

Step 02-Open the Terminal and verify that Mininet is available.

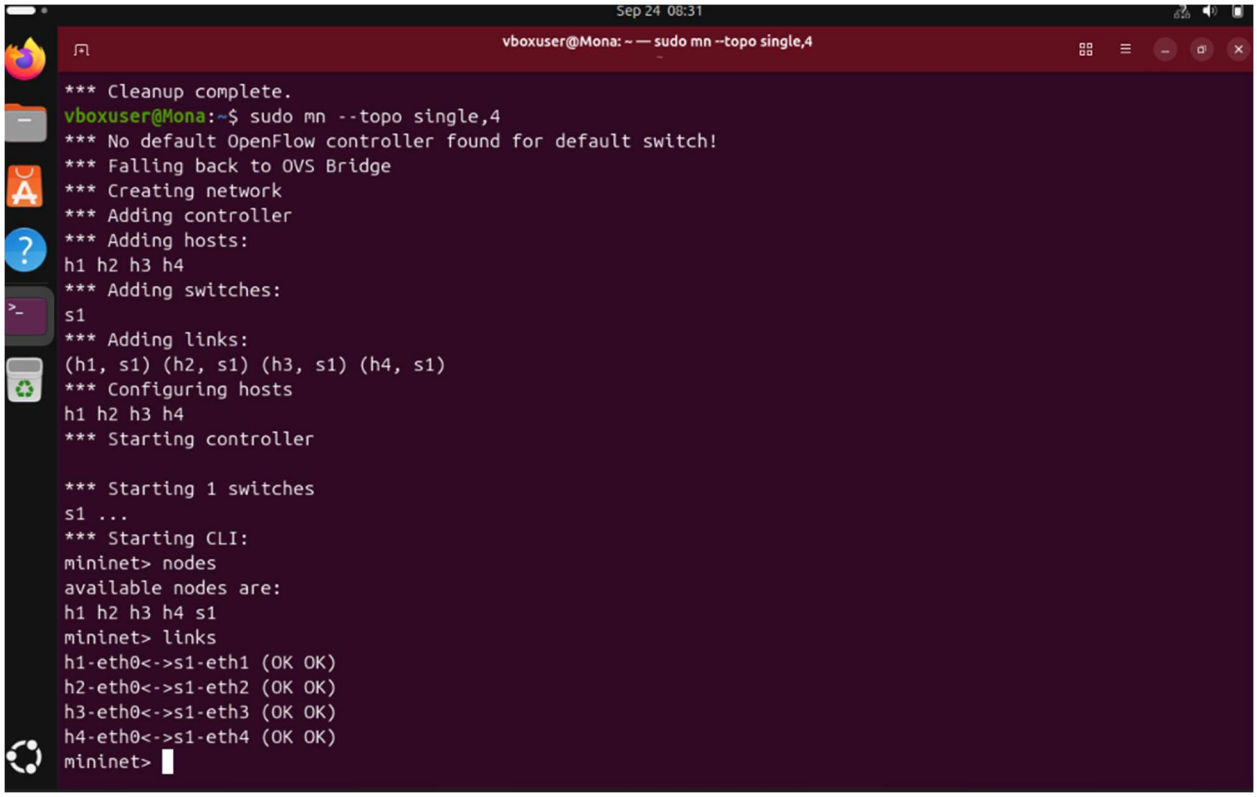

Step 03-Start a simple Mininet network topology.

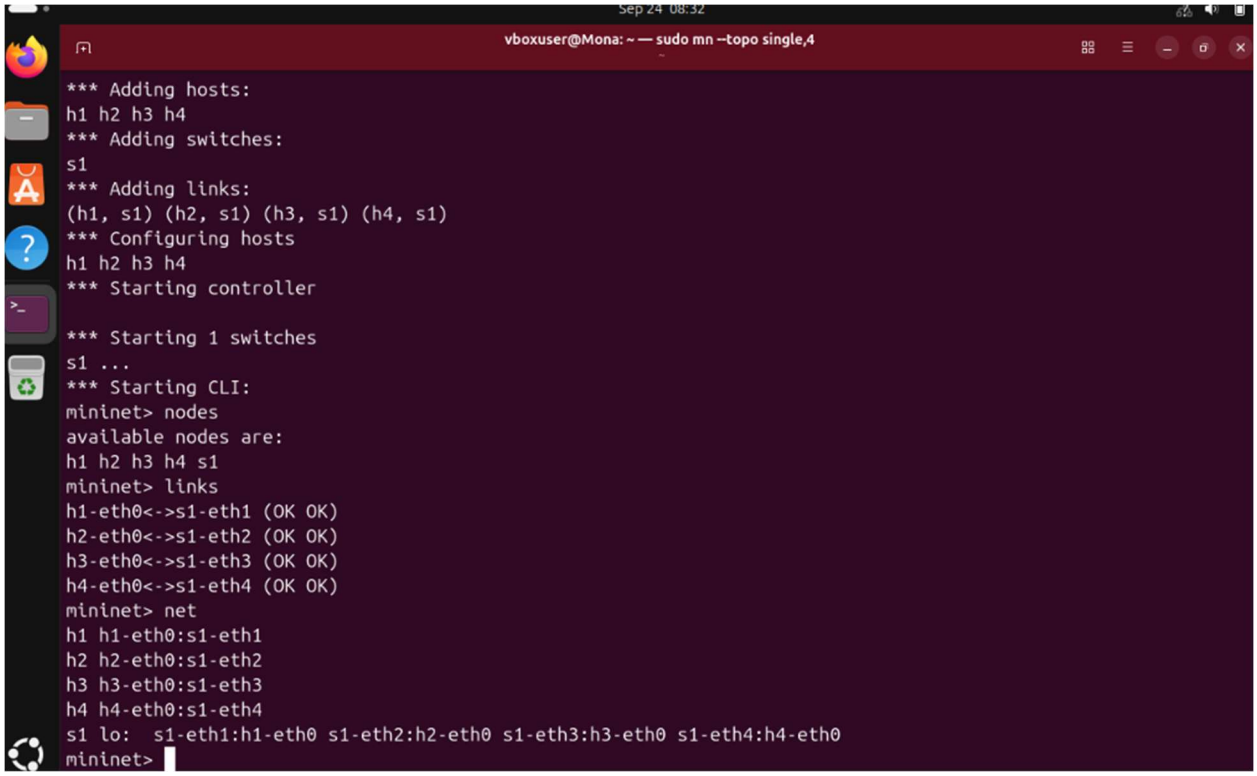

Step 04-Display the nodes available in the topology.

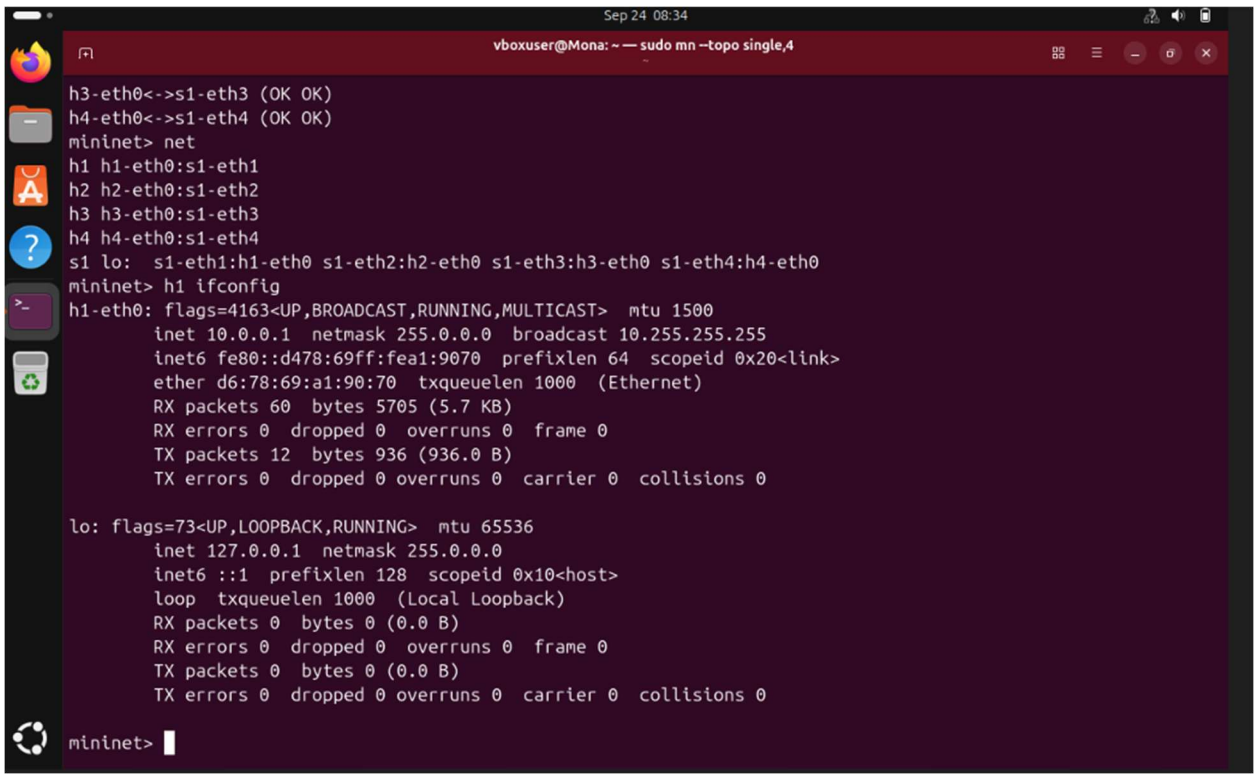

Step 05-Display the links between the virtual network nodes.

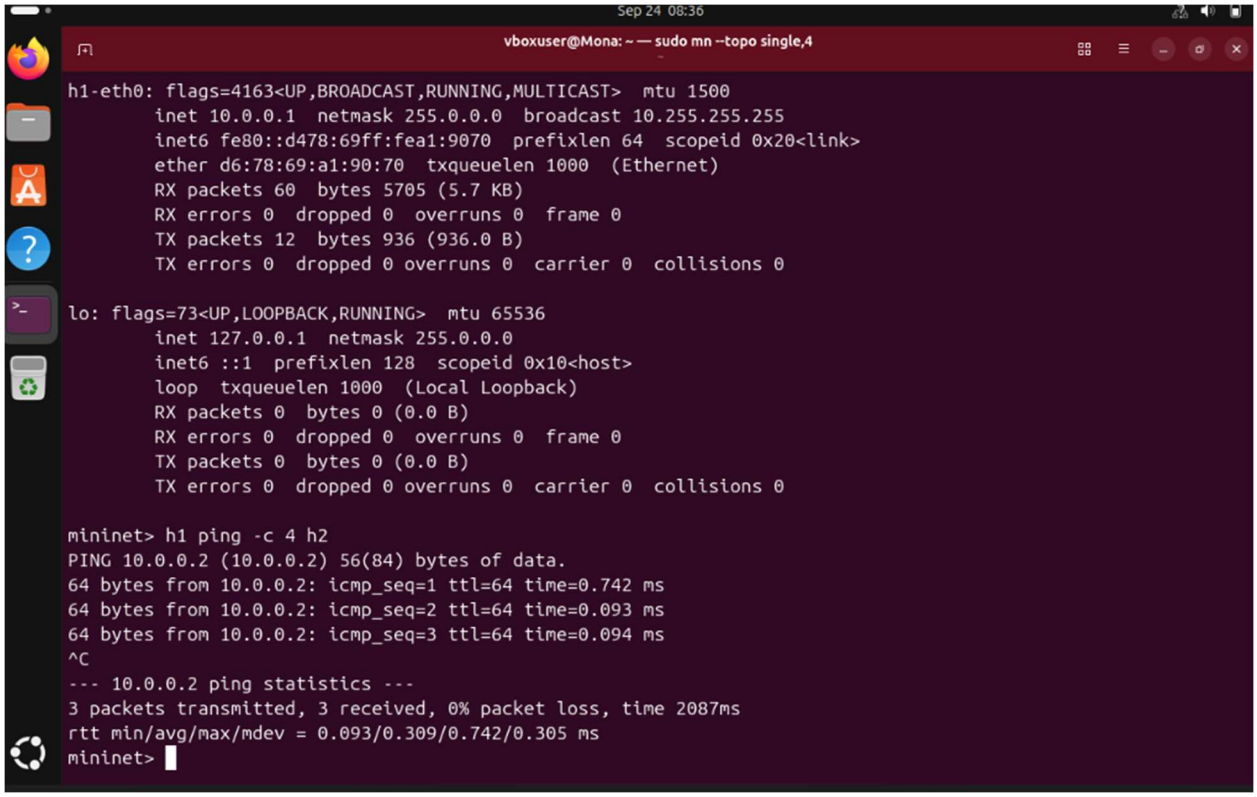

Step 06-Display the complete network topology.

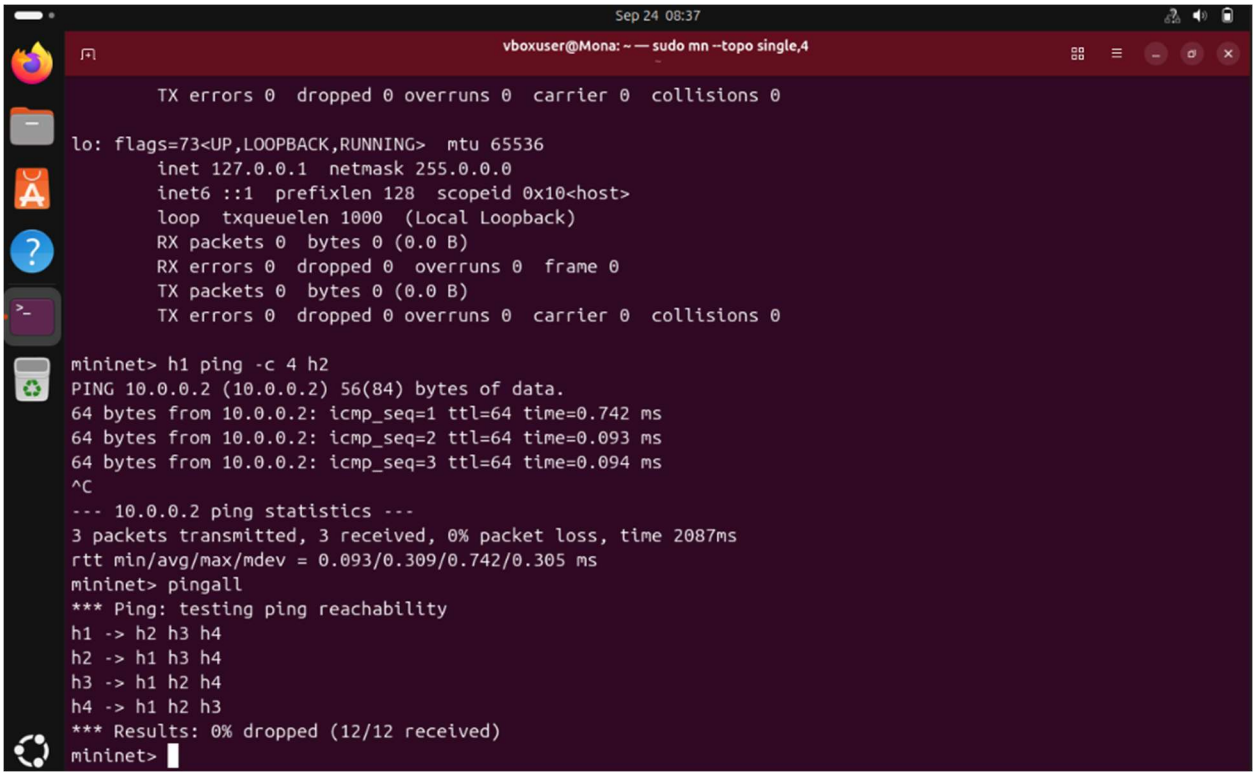

Step 07-Check the IP configuration of the virtual hosts.

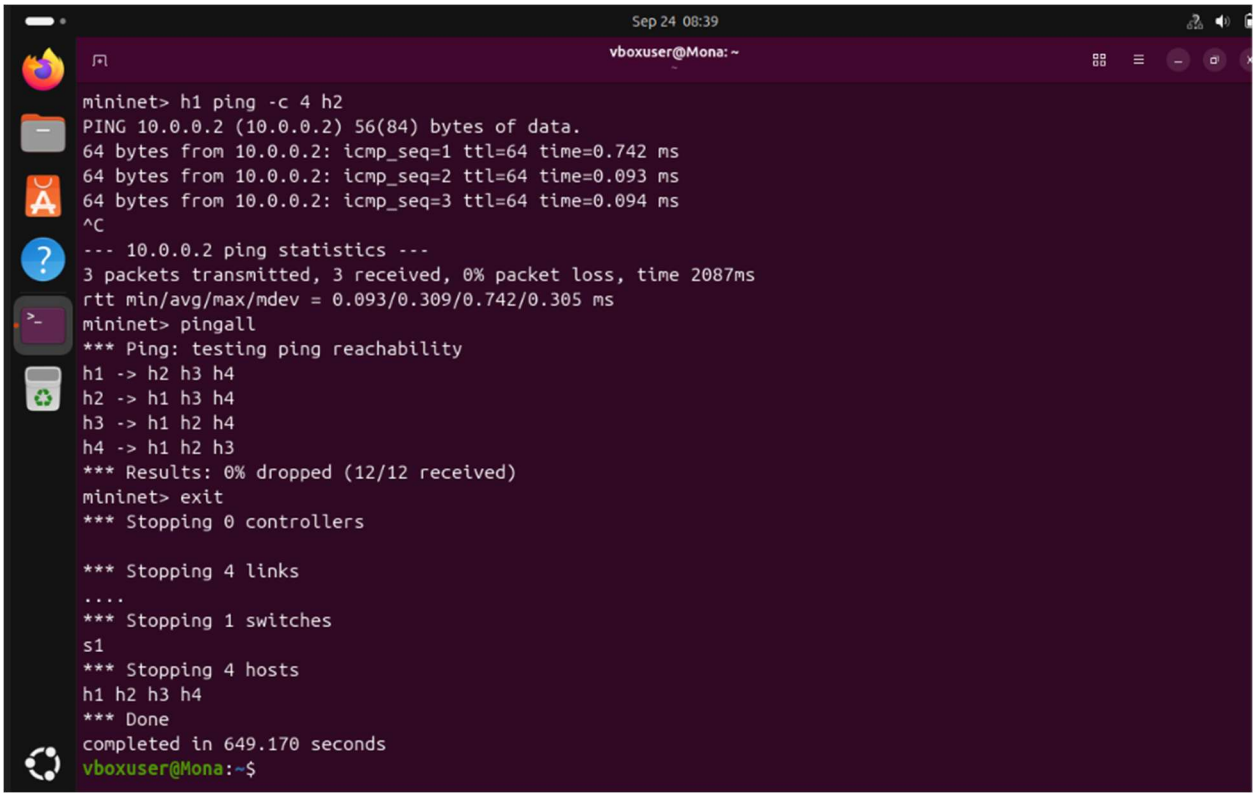

Step 08-Test communication between the two virtual hosts.

Step 09-Verify connectivity between all hosts using Mininet.

Step 10-Stop the Mininet network and exit.

Step 11-Clean up any remaining Mininet configuration.
